EDUCATION

Queen Mary, University of London

BSc Computer Science (Hons)

Sept. 2024 – Aug. 2027

London

- 1st Class Honours (1:1), 4.0 GPA. Relevant Modules: Data Structures, Algorithms, Databases, Computer Systems, Automata

Townley Grammar School

A-Levels in Maths, Physics, Computer Science

Sept. 2022 – Aug. 2024

Bexleyheath

- A-Levels: Mathematics (A), Computer Science (A), Physics (B).
- GCSEs: (8) (6-8) including Mathematics (8), English Language (8), Combined Science (7-8)

EXPERIENCE

Technical Consultant

Verafind

Sept. 2026 – Present

London

- Develop and improve Verafind's property technology portal and internal tooling.
- Build and test AI models and AI-driven applications, from research through to implementation.
- Deliver data-driven solutions using APIs and external datasets for client land research.

Technology Developer Intern

Verafind

Aug. 2026

London

- Built an application using APIs and Vision Language Models (VLMs) to analyse and assess data.
- Assessed public databases and data sources for feasibility in the land-matching pipeline.
- Conducted market and sector research to identify opportunities and provide client insight.

Software Engineering Intern

Novogym

July 2026

London

- Built **NovoFlow**, a Python web app (SimPy, pandas, NumPy) modelling equipment use and member flow.
- Collected on-site and remote data to calibrate the model and support decision-making.
- Built Streamlit dashboards to visualise insights, working in a team of two.

Interactive Developer

Freelance

Feb. 2025 – Feb. 2026

London

- Developed and maintained interactive web applications, hosted on Neocities and Netlify.
- Used Node.js, React, Bootstrap, Tailwind CSS and XAMPP (Apache, phpMyAdmin).
- Designed 2D and 3D models in Blender and Roblox Studio for client projects.

PROJECTS

Automated Audio Directory and Playback Website

Jan. 2026 – Present

- Developed using HTML, Tailwind CSS, Node.js, Netlify
- Displays automatically generated music in a sorted, professional layout; built with a client.

Construction Weather Website-Application

March 2026 – April 2026

- Developed using HTML, Tailwind CSS, React.js, Node.js, Figma, OpenWeather API, Geolocation API
- Real-time weather and forecasts by geolocation, with safety guidance for outdoor construction workers.

Employee Portal Web Application — FDM

March 2026 – May 2026

- Developed using HTML, Tailwind CSS, React.js, Node.js, Spring Boot, MySQL
- Portal for staff to access their information, submit requests and manage their tasks.

Horse-Race Simulator and Data Analyser

April 2025 – May 2025

- Developed using Java, IntelliJ IDEA, Java Swing, XChart
- Simulates horses over variable track lengths and weather, with live stats, analysis and logging.

Productivity and Time-Management Application

Aug. 2024

- Developed using C++, Unreal Engine, Adobe CC, Paint.NET
- Tracks productivity and work habits over long periods, with a heavy focus on feel and aesthetics.

SKILLS

Languages: Python, Java, JavaScript (React.js, Node.js), C#, C++, PHP, SQL (MySQL, Oracle Live), HTML/CSS, Lua, Bash, JSON

Frameworks & Libraries: React.js, Node.js, Tailwind CSS, Bootstrap, SimPy, pandas, NumPy, Streamlit, Java Swing, XChart

Developer Tools: VSCode, IntelliJ IDEA, GitHub, Jupyter, Figma, XAMPP (Apache), Wireshark, Visual Paradigm, VirtualBox, Linux, macOS

Engines & Design: Unity, Unreal Engine, Roblox Studio, Blender, Adobe CC (Photoshop, Premiere Pro), Paint.NET, FL Studio, Audacity

Certifications: Bloomberg Finance Fundamentals, 2026 — [click to view](#)

Interests: Music Production, Guitar, Piano, 3D Design, Game Development, Photography, Video Editing
